Ultra-slim, bright and elegant design

If you are looking for slender high-performance windows that let in lots of natural daylight, you might want to consider **SlimLine 38** by Euro America Windows for your next project.

Perfect for both minimalistic new-builds and renovation projects, the timeless steel look window system blends perfectly with any architectural style and opens your home to incredible views.

Multiple design variants, safety variants such as burglarproof (RC2 / PAS 24) and fireproof, and a wide range of opening types help you create the ideal window solution for your unique building project. What is more, SlimLine 38s low-carbon Cradle To Cradle® certified design matches all your sustainable building needs, today and tomorrow.

Futureproof and durable product.

As less material is needed to create the slender yet sturdy windows, SlimLine 38s carbon footprint is remarkably low. Moreover, the Cradle To Cradle® certified profiles are 100% recyclable, while the system's high-insulation variants help you meet all of your low-energy building needs. Enjoy excellent thermal performance all year long.

Slim steel-look design.

SlimLine 38 windows combine timeless steel-look design with all the benefits of aluminium profiles. Tradition meets modern day technology as the high-performance system offers slim aesthetics and an abundance of natural light. Easily create impressive views with slender opening vents of up to 3 metres in height.

Crisp, high-quality finishing in every detail.

High quality design is most visible in the finest of details. For SlimLine 38, this means all hardware, including hinges and drainage options, is subtly concealed inside the ultraslim profiles. Even burglarproof and fireproof upgrades are available with this refined solution. Moreover, SlimLine 38 is widely available thanks to our vast network of professional partners. Its versatility makes it the perfect solution for all kinds of (renovation) projects, including yours.

Functional

Classic

Cubic

Ferro

SlimLine 38 High Insulation +

Futureproof & slim aesthetics

SlimLine 38 High Insulation + inward and outward opening windows build on the success story that is SlimLine. Suitable for low-energy or even passive building projects, the futureproof variant uses recycled thermal breaks and a minimal amount of EPDM to drastically limit both its embodied and operational carbon footprint.

SlimLine 38-HI+ has a larger system depth than the standard system, yet offers the same slender aesthetics, the same popular design variants and comes at a very competitive price. What is more, the optimised production process limits the risk of possible mistakes during fabrication. Enjoy sustainable design that lasts a lifetime.

Thermal value - Uw (W/m²K)	Down to 0.74
Acoustic performance	48(-1;-3) dB
Air tightness	4 (600 Pa)
Water tightness	9A (600 Pa)
Wind load resistance	C3 (1200 Pa)
Burglarproof	RC 2 / PAS24

Possible vent sizes (mm)

*Max dimensions and weights depend on multiple parameters including wind load requirements and glass type choice.

Maximum vent weights (kg)

SlimLine 38 Windows Options

Concealed drainage

Thanks to this concealed drainage solution, you no longer need plastic cover caps to hide drainage holes. As a result, you always enjoy clean lines, minimalistic design, and excellent performance as the water flows away. Default solution for SlimLine 38.

Flyscreen

SlimLine 38 windows can be enhanced with convenient add-on flyscreens. Often overlooked at first, it is one of the most popular options amongst our customers.

Concealed hinges

The difference often lies in the smallest of details. That is why subtly concealed hinges are the ultimate finishing touch for your windows and doors. With the hardware hidden from sight, you get a clean look both when the system is opened or closed.

Glass balustrade

Safety can equal beauty. We enhance our windows with this elegant glass barrier to avoid accidents, especially in high-rise buildings. Residents can still let in a fresh breath of air, without any worries.

Design

You recognise minimalistic SlimLine windows by their elegant and ultraslim look. Whether you choose the system's Classic, Cubic, Ferro, or Functional design variant, you always get that steel-look appearance which matches every type of building style. But beautiful design does not mean lack of quality. SlimLine 38 windows offer the perfect low-energy upgrade to your project, all while keeping its visible sightlines to a minimum.

Sustainability

SlimLine 38 windows are always a responsible choice. The Cradle To Cradle® certified system features ultraslim profiles which require less aluminium to make, as well as recycled low-carbon thermal breaks. As a result, the windows have a lower embodied carbon level than most competitor systems. What is more, aluminium is 100% recyclable, which means you can re-use it an infinite amount of times without loss of quality.
